# Slope and y-intercept

Answer key

Find the slope and y-intercept of each line.

slope = 4

y-intercept = -8

slope =  $-\frac{4}{9}$

y-intercept = 2

slope =  $\frac{5}{8}$

y-intercept = 5

slope =  $-\frac{1}{5}$

y-intercept = -3

slope = 1

y-intercept = 0

slope =  $-\frac{1}{3}$

y-intercept = -4

slope =  $\frac{12}{5}$

y-intercept = 16

slope =  $-\frac{1}{3}$

y-intercept = -8

slope =  $\frac{3}{16}$

y-intercept = 6
